

Texas / Amarillo (Palo Duro Canyon)

The Lighthouse Trail

DISTANCE: 5.8 miles

ELEVATION GAIN: 500 feet

ROUTE TYPE: Out & Back

This was an amazing hike. I would rate the first 2.7 miles easy, the very end is steep but for a short short time. It was a great family hike, with lots of dogs and kids on the trail. It took us 3 hours round trip and was a little over 6 miles from the parking lot (the park has it posted at 2.7 one way). Bring lots of water, highly recommend this one!

This is a nice long hike that is pretty easy. great views! at the wnd of this trail is a steep climb up to the lighthouse. i recommend a rest on top to recover for the long hike back. It is also fairly windy out there.

An incredible trail to see the symbol of Palo Duro Canyon. The majority of the trail is flat and has a solid dirt path which is hard to get off of and is hard top get lost. The last part of the trail is the steepest as you approach the Lighthouse and can be difficult for some people. But overall it is an incredible trail and definitely worth getting to see something like the Lighthouse.
